EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicant's representative Mr. Thomas E. Brown on April 10, 2008.

2. The application has been amended as follows:

2.1 Change the title to the following:

Image Processing Apparatus and Method for Moving
Object-Adaptive Compression

2.2 Claim 1, line 4: change "screens" to "continuous screens"

2.3 Claim 1, line 6: change "corresponding the said" to "corresponding to said"

Allowable Subject Mater

3. Claims 1, 2 and 5-7 as amended are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1 and 7, closest art of record does not disclose all limitations. Specifically, Kaku (US 2002/0109780) additionally discloses updating, for each image, the compression ratio to satisfy the size condition of equation 2 in paragraph 36. [See also Fig. 3, refs. S21-S33.] However, Kaku and other closest prior art references (including those previously applied and/or cited), alone or in combination, do not disclose, teach or fairly suggest at least that the fourth compression rate regarding said second portion image is higher than said second compression rate and that the fourth compression rate having a predetermined size condition satisfied between a screen of a compressed image signal in which the specified subject exists and another screen of the compressed image signal in which the specified subject does not exist, as required by claims 1 and 7.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion and Contact Information

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- JP-2001036901A, JP-09200764A, JP-10271515A and JP-05075987A: All disclose encoding specific regions differently from other regions
- JP-08181992A: discloses detecting regions of interest and regions with motion and encoding those regions differently
